

## ► Intellicom, a better way to answer your phone 24/7

We combine telephone answering, voice messaging and cascade emergency call dispatching, into one professional call processing service.

Because of this advanced design, your callers will never be

Answering your phone and delivering your emergencies

placed on hold again. Emergency messages will be immediately dispatched to up to 5 different locations or the client experiencing an emergency can be connected directly to your cell phone. There is no longer any misinterpretation. Because of this your messages are screened better and true emergencies are taken care of promptly.

General messages are retrieved at your convenience. Plus there is an information center that allows new clients or prospects to hear about your unique product or service. This is an ideal service for apartments, plumbing, heating and air conditioning specialists, Doctors, dentists, psychologists or anyone that needs reliable 24 hour phone coverage.

Bilingual service is also available.

INTELLICOM is tailored for your specific requirements and implemented to achieve the flexibility you desire. When you are away from your office, your phones will always be answered immediately and professionally. No one will ever be placed on hold and they will be allowed to leave a clear, concise, detailed message.

An optional security feature allows you to receive copies of your general and/or emergency messages right on your desktop PC. Messages can be copied to a WAV file and attached to your email. This enhanced process allows you and your staff to properly monitor and bill when appropriate and archive for security.

The most amazing feature of this service is that it comes to you for a **low FLAT monthly rate**. There are no additional usage or per call charges.
